

## **Spare Parts Warranty & Policy**

**What is covered:**

This spare parts policy covers all spare parts and subassemblies manufactured by Stored Energy Systems (SENS).

**What is not covered:**

Component parts of subassemblies (e.g. resistors, etc. from printed circuit cards) are not covered.

**Availability of spare parts:**

Replacement parts are available for five (5) years from the last production date, subject to availability of vendor-supplied items or out-of-production parts. In the event an item is out-of-production, SENS will make its best attempt to substitute currently available parts.

**Condition of parts:**

Spare parts will be new for products currently in production. Spare parts for out-of-production products will be new or factory reconditioned parts functionally equivalent to new. All parts, whether new or reconditioned, are certified by SENS to be in correct operating condition.

**Warranty of spare parts:**

The warranty for spare parts is six months from the ship date on material and workmanship. Installation of a spare part does not affect the original warranty of the SENS product.

**Limitation of warranty:**

The spare parts warranty is limited to defects in material or workmanship of the part(s). It does not cover loss of time, inconvenience, property damage or any consequential damages. Repair, replacement or refund of the purchase price of the equipment is the exclusive remedy.
